

Step Into C++: Drawing a line

Mr. Neat
C++

How do you make
a line?

How do you make
a line?

```
cout << '0%' << '0%' << '0%' << '0%' << '0%';
```

How do you make
a line where the user
gets to pick the
symbol?

```
char sym;  
cout << "Please enter....:";  
cin >> sym;  
cout << sym << sym << sym;
```

How do we do something a
known number of times?

Sort of like....

```
loop(5)
```

```
{
```

```
  // stuff
```

```
}
```

In C++....

```
int i;  
for(i = 0; i < 5; i++)  
{  
    // stuff  
}
```

C++ Lab3 - drawline

- write a program that draws a line on the screen
- let the user pick the line symbol, line length and whether it is horizontal or vertical

Please enter the symbol: *@*

Please enter line length: 8

horizontal of vertical: h

@@@@

Any ?'s
